

SULPHUR SPRAYING IN CANOPY MANAGEMENT

Sulphur sprays (Sulphur smells like rotten eggs) in the vineyard can be absorbed onto clothing and skin.

Whilst not dangerous to health, (some people are allergic and must STOP working in the vineyard during spray season). It stinks if not attended to on a daily basis.

I've found that these three items assist in eliminating odours on the skin, hair and clothing.

Body/skin

1. **Femfresh** (roughly \$6.00/bottle) lasts me about 2 weeks.

Using a decent amount, I scrub my body from top to bottom (including hair), rinse, apply again and rinse.

Clothing

2. Dynamo I use two products:

(a) **Dynamo deep clean professional with odour eliminating properties** (About \$18.00)

(b) **White King bleach tablets** (about \$4.50)

Firstly, I soak my clothes with 2 x bleach tablets (they start to fizz on contact with water) and a capful of Dynamo for about 15 minutes, stirring every 5 minutes.

Then, wash in washing machine as normal. It's the soaking that gets out the odours. If you wash as normal, it won't be as effective.
